

Speak Up™

Medication safety is a team effort. You, your doctor, pharmacist, and other caregivers all have a role in making sure you get the right medication, take the correct dosage, and avoid bad reactions. It's important to know what questions to ask about a new medication and to Speak Up if something doesn't sound right.

Your medication list is your first responsibility

Make sure you have a current medication list with you at all times. Carry it with you, and have it with you at the doctor, pharmacist, and other caregivers.
